Annual Plan of Operations/ 310 Maintenance Plan

Note: Annual maintenance applies to the **REMOVAL** of silt and other debris that may interfere with agricultural irrigation.
If any material is being **ADDED**, a 310 permit must be applied for.

General Information

Name of Ditch: _____ Name of Stream: _____

Lat: _____ Long: _____ Headgate Location: _____

Maintenance Plan

How often will work be done in front of the headgate?

Is work being done in the streambed as well as the ditch? If yes, describe the work that will be done.

How far from the headgate will work be done (upstream & downstream)?

Is the diversion from the stream before the headgate or at the headgate?

What contractor will be performing the work?

What machines will be used to perform the maintenance work?

Please include a map with the maintenance area clearly labeled.
