26-011 Tabled from June Meeting-At the applicant's request, this application was tabled pending change in scope of work. The current proposal for bank stabilization and flow deflection near the fishtail bridge area on West Rosebud Creek raised concerns from FWP (Bryan Giordano) regarding proposed filling of undercut banks and a channel diversion. The applicant also requested SCD staff search historical records (approximately 1970–1992) related to prior bridge stabilization work. The application remains incomplete pending five additional items requested by the District Administrator on June 1. If a revised application is submitted, it will return as 26-011R1.
